PriceIndices

Goals of PriceIndices are as follows: a) data processing before price index calculations; b) bilateral and multilateral price index calculating; c) extending multilateral price indices.

Installation

You can install the released version of PriceIndices from GitHub with:

```
install_github("JacekBialek/PriceIndices")
```

Data frames used in the package

In the most typical case……

```
library(PriceIndices)
head(milk)
#>         time prices quantities prodID retID description
#> 1 2018-12-01   7.98        6.5 400032  1311   goat milk
#> 2 2018-12-01   7.98       91.5 400032  2210   goat milk
#> 3 2018-12-01   7.98       19.5 400032  6610   goat milk
#> 4 2018-12-01   7.98       15.5 400032  7611   goat milk
#> 5 2018-12-01   7.98       43.0 400032  8910   goat milk
#> 6 2019-01-01   7.98        4.5 400032  1311   goat milk
